

# Keep your dog happy and healthy this winter.

## Unlock their youthful mobility with the powerful combination of Dual Joint Care of Zydax and Glyde.

**Zydax:** works to modify the disease and slows cartilage degradation by blocking destructive enzymes as well as stimulating new cartilage growth.

**Glyde:** provides the building blocks for developing cartilage.

Research has shown that **Zydax** and **Glyde** used in combination as part of Dual Joint Care delivers superior clinical results compared to either treatment used alone.

**Every dog who has a full course of Zydax injections and buys Glyde Mobility Chews or Powder will receive an additional Glyde tub for FREE!**

# Have you taken our Online Osteoarthritis Risk Assessment?

The Risk Assessment will take you through a series of questions about your pet.

- 🐾 End assessment is based on answers to questions around breed, age, joint history, body condition and ability to perform common activities.
- 🐾 Dogs are placed into either low, medium or high risk categories.
- 🐾 Results of the assessment are emailed to you.
- 🐾 Share your results with your Vet for treatment options.

## Could my dog have arthritis?

Osteoarthritis doesn't just happen to older dogs. Surprisingly, 20% of dogs show signs as early as age 1 and 80% of dogs will show signs by age 8.

Take this assessment to get your dog's personalised results.
