Important Information:

THE BIG 5 PROTECTION PACK

- Read the enclosed Interceptor Spectrum and Credelio™ leaflets for full instructions
- Bundle pack can only be used in dogs from 2.5kg and 8 weeks of age
- Credelio should be given with or following food

SENTINEL SPECTRUM

- Read product leaflet for full instructions
- Give monthly with a full meal
- Does not kill adult fleas
- For dogs from 6 weeks of age

MILBEMAX

- Read product leaflet for full instructions
- Milbemax Tablets for Dogs and Milbemax Tablets for Cats are distinct formulations and should only be administered to dogs and cats respectively
- The safe administration of Milbemax is supported in dogs from 0.5 kg and 2 weeks of age and in cats from 0.5 kg and 6 weeks of age
- For heartworm prevention, Milbemax must be administered every month, preferably on the same date each month
- In hydatid tapeworm areas, dogs should be dosed monthly or on vet advice

INTERCEPTOR SPECTRUM

- Read product leaflet for full instructions
- For dogs from 2 weeks of age

COMFORTIS PLUS

- Read product leaflet for full instructions
- For use in dogs from 8 weeks of age and 2.3 kg
- Comfortis PLUS should be administered with food for maximum effectiveness
